Product Designer

I am passionate about identifying challenges and transforming them into impactful solutions. Driven by curiosity, persistence, and innovation, I explore creative and strategic approaches that deliver exceptional results for both users and businesses.

WORK EXPERIENCE

UX Design Intern - Pennee

October 2022 – February 2023

As a UX Design Intern at Pennee, I contributed to designing and enhancing user experiences for financial technology solutions. My role involved conducting user research, creating prototypes, and collaborating with cross-functional teams to improve product usability and accessibility building and managing the design system.

- Assisted in designing user-centered digital experiences, focusing on usability, accessibility, and intuitive navigation.
- Conducted user research and usability testing, gathering insights to enhance product functionality.
- Created wireframes, prototypes, and UI mockups using Figma to visualise and test design solutions.
- Collaborated with developers to ensure seamless implementation of UX/UI designs.
- Contributed to the improvement of Pennee's digital products by analyzing user feedback and iterating on designs.

UX Design Intern - SafeBridge

July 2022 - October 2022

As a UX Design Intern at SafeBridge, I worked on improving digital experiences by designing intuitive and accessible interfaces. My role involved conducting user research, developing prototypes, and collaborating with developers to create seamless user interactions. gathering and evaluating requirements;

- Designed and optimized user-centred interfaces, focusing on accessibility and ease of use
- Conducted user research and usability testing to refine product features based on feedback.
- Created wireframes, prototypes, and UI mockups using Figma to visualise design concepts.
- Worked closely with developers and product managers to ensure effective UX implementation.
- Analyzed user behaviour and iterated on designs to improve engagement and usability.
- Assisted in refining SafeBridge's digital products, enhancing user satisfaction and functionality.

SKILLS

Information Architecture
Sketching
Wireframing
Prototyping
UI Design
UX Laws
Accessibility
User Testing
Design Research
Interaction Design
Information Architecture
Programming Languages:
JavaScript, HTML, CSS
Soft Skills: Problem-solving, multitasking, time management, strong communication and adaptability.

TOOLS

Figma, XD
Whimsical, Miro
JIRA, Agile,
Scrum (basic knowledge)

WORK EXPERIENCE (CONT.D)

Engineering Graduate Intern – Cavista Technology

May 2022 - July 2022

As an Engineering Graduate Intern at Cavista Technology, I collaborated with cross-functional teams to develop and implement innovative software solutions, contributing to projects that impacted thousands of healthcare organisations. My role involved problem-solving, software development, and ensuring effective communication across teams.

- Developed and implemented innovative software solutions as part of a cross-functional team.
- Contributed to projects benefiting over 9,000 healthcare organizations, improving efficiency and scalability.
- Identified and resolved complex issues in software development processes, enhancing system performance.
- Maintained effective communication with team members and stakeholders to ensure smooth project execution.

Development Executive – HealthBetter Limited

April 2021 – February 2022

Worked as a Business Development Executive. My responsibilities were:

- Researched and identified new business opportunities and technological trends.
- Generated leads and managed customer communications
- Analyzed customer needs and developed effective response strategies
- Kept abreast of trends and changes in the business and technology world.

QA Tester - Sidmach Technology

November 2020 – December 2020

Worked as a QA Tester. My responsibilities were:

- Executed comprehensive testing procedures to identify and resolve software bugs
- Collaborated with development teams to align testing processes with user requirements
- Improved software performance and user experience through rigorous quality assurance
- Utilized various testing methodologies including unit, integration, and system testing

Software Development Intern - Sidmach Technology

May 2019 - October 2019

Worked as a Software Development intern. My responsibilities were:

- Developed applications using JavaScript, HTML, and CSS.
- Worked as part of a research team to solve problems and create new products.
- Documented and tested new software applications.
- Maintained open communication and positive working relationships with staff.

EDUCATION

Birmingham City University

MSc User Experience Design.

2023 - 2024

Caleb University

B.Sc. Computer Science.
2016 - 2020
