PROFESSIONAL SUMMARY

Versatile technology professional combining strong coding skills with UX design expertise. I am passionate about creating user-friendly solutions, I bring a unique approach to developing robust and intuitive applications. I am eager to leverage my skills in JavaScript, HTML, CSS, prototyping, and QA testing to build impactful digital experiences that make a real difference.

EDUCATION

Birmingham City University | MSc User Experience Design | 2023 – 2024(Completed)

- Key modules: Visual Interface Design, Human-Centred Design, Accessibility and Assistive Technology.

Caleb University | BSc Computer Science (Second Class Honours, Upper Division; 2.1) | 2016-2020

- Key Modules: Human-Computer Interface, Software Engineering, Modelling and Simulation, Operation Research.

SKILLS

- **Programming Languages:** JavaScript, HTML, CSS
- **Software Development:** Full-stack development, Version Control
- **UI/UX Design:** Figma, Prototyping, Wireframing
- **Software Testing:** Unit, Integration, System, and Acceptance Testing
- **Tools & Methodologies:** JIRA, Agile, Scrum (basic knowledge)
- **Soft Skills:** Problem-solving, Multi-tasking, Time Management, Strong Communication, Adaptability.

PROFESSIONAL EXPERIENCE

Engineering Graduate Intern | Cavista Technology | May 2022 - July 2022

- Collaborated with cross-functional teams to develop and implement innovative software solutions.
- Contributed to projects benefiting over 9,000 healthcare organizations
- Identified and resolved complex issues in software development processes
- Maintained effective communication within the team and with stakeholders

Development Executive | Healthbetter Limited (NYSC) | April 2021 – February 2022

- Researched and identified new business opportunities and technological trends
- Generated leads and managed customer communications
- Analysed customer needs and developed effective response strategies
- Kept abreast of trends and changes in the business and technology world

QA Tester | Sidmach Technology | November 2020 - December 2020

- Executed comprehensive testing procedures to identify and resolve software bugs
- Collaborated with development teams to align testing processes with user requirements
- Improved software performance and user experience through rigorous quality assurance
- Utilized various testing methodologies including unit, integration, and system testing

Software Development Intern | Sidmach Technology | May 2019 - October 2019

- Developed applications using JavaScript, HTML, and CSS
- Worked as part of a research team to solve problems and create new products
- Documented and tested new software applications
- Maintained open communication and positive working relationships with staff

PROJECTS

- **Cryptocurrency Application:** Designed and developed using Figma and web technologies
- **Event Planning Website:** Created a responsive web application using JavaScript, HTML, and CSS
- **Music Application:** Developed a web-based music player with custom UI/UX design
- **WAEC Website Replica:** Engineered a functional replica focusing on improved user experience and performance
- **Travel App Website:** Designed and implemented a user-friendly interface for a travel application

LEADERSHIP EXPERIENCE

Group Leader | Caleb University | September 2019 - January 2020

- Led team projects, assigned tasks, and managed project timelines
- Facilitated communication between team members and stakeholders
- Prepared meeting agendas and presentations

ADDITIONAL SKILLS

- Effective use of social media platforms for content creation and engagement
- Strong research and strategic planning skills

LANGUAGES

- **English (Fluent)**
